SUMMARY

Recent Computer Science graduate from DHA Suffa University, Karachi, with a strong foundation in software development and web technologies. Proficient in Python, FastAPI, Flask, MongoDB, HTML, CSS, and JavaScript, with experience building responsive web applications and backend APIs. Passionate about developing efficient, scalable, and user-focused solutions while continuously learning new technologies. Strong problem-solving, analytical, and teamwork skills with the ability to adapt quickly to new challenges. Seeking an entry-level Software Developer, Python Developer, or Backend Developer role to contribute technical expertise and grow in a professional environment.

EDUCATION

Bachelor of Computer in Science DHA Suffa University, Karachi	2022 - 2026
School/College Pre-Engineering Roshan Tara School/College Panoaqil.	2019 - 2021

SKILLS

- **Programming Languages:** Python, HTML, CSS, JavaScript
 - **Database:** MySQL, MongoDB
 - **Libraries:** Pandas, Numpy, OpenCV, Matplotlib, Scikit-Learn, FlaskAPI, Seaborn
 - **Tools:** Git, GitHub, VS Code, jupyter Notebook, Postman
 - **Concepts:** OOP, Data Structure & Algorithms, Machine Learning
-

Experience

MRMSoft Inc.	June 2025- Dec 2025
▪ Worked on Python and backend development projects. ▪ Developed and maintained backend functionalities using Python. ▪ Debugged and tested applications to improve performance. ▪ Applied OOP concepts to write clean and efficient code. ▪ Collaborated with the development team on software development tasks.	

PROJECTS

Smart Surveillance Activity Recognition System	2026
Technologies: HTML, CSS, React.js, Python, Flask, MongoDB	
▪ Developed a CNN + LSTM-based human activity recognition system for surveillance videos. ▪ Implemented video processing and activity prediction with confidence scores. ▪ Built backend APIs using Python & FastAPI and integrated MongoDB for prediction storage. ▪ Developed a web interface using HTML, CSS & JavaScript with secure authentication and OTP verification.	

TeachLink– Smat Tutor Platform (Final Year Project)	2025-2026
Technologies: HTML, CSS, React.js, Python, Flask, MongoDB	
▪ Developed a tutor-student platform to connect teachers and students through a responsive and user-friendly interface. ▪ Implemented secure user authentication, profile management, tutor job posting, and application features using Flask and MongoDB. ▪ Built RESTful APIs to enable communication between the frontend and backend. Integrated real-time chat functionality for seamless communication between tutors and students. ▪ Designed an admin dashboard to manage users, tutor requests, and platform activities.	
AI-Based Job Recommendation	2025
Technologies: Python, Tkinter, Scikit-learn, ReportLab	
▪ Built a machine learning application using KNN to recommend suitable job roles. ▪ Generated personalized PDF reports automatically. ▪ Designed an interactive GUI using Tkinter.	
Expense Manager Using Python	2024
▪ A Python-based desktop app for managing and analyzing daily income and expenses, built using OOP principles with SQLite for secure, persistent data storage.	
DSA Based Flight & Car Booking System	2023
▪ A Java Swing desktop app for flight booking, car rentals, and hotel management, showcasing OOP and DSA for efficient data handling and a smooth user experience.	
Online Book Store (HTML, CSS, JavaScript)	2022
▪ A responsive online book store web app that lets users browse books, search by title or author, and manage their cart for a smooth checkout experience.
